Mr. Morris,

On behalf of Weatherford International, I would like to thank you and your team for the outstanding job you did in assisting us with our Data Center move from our corporate headquarters to Cyrus One.

From our first planning meeting, you provided us with a reassurance that our Server and Storage gear would be well taken care of with procedures that exceeded our expectations and allowed us to focus on the internal processes to make this move a success.

On the day of the move, your entire staff was very professional and took care in handling our equipment from source to destination. In the end, I am very proud to report, that after moving 10 racks of Servers, 4 racks of Storage and a Tape Library, there were no hardware faults reported and still remain fault free. The efficiency in which your team operated allowed us to bring our systems back online ahead of schedule.

With all of the stress that goes along with a Data Center move of any size, working with you and the rest of the staff at Clark, Duncan & Morris alleviated those concerns which contributed to the success of this project.

Regards,

Brian Clarke  
Network Services Manager  
Weatherford International
