Houston, Texas

Peter,

On behalf of Transocean Offshore Deepwater Drilling, Inc., I would like to thank you and your team for an outstanding job in our successful data center move of our Tier 1 critical business applications. The move from our Houston data center to CyrusOne, in Lewisville, was a significant project this year for our business and your team was instrumental to our success.

The CEO of CyrusOne indicated that this was one of the largest and fastest data center moves his team had been a part of in their history. He accredited that success to our partnership, however I would be remiss to not recognize your team was a significant contributor to the overall effort.

We found you and your staff to be responsive and professional throughout the project duration covering several months. Your team relocated a large volume / high dollar equipment to our new co-location facility resulting in zero damage or loss. This is no doubt a commendable effort given the size / scale of this initiative.

I could not have been more pleased and look forward to our continued business relationship.

Sincerely,

A handwritten signature in blue ink that reads 'Chip Dyson'.

Chip Dyson
Director, Information Technology
